

ENGLISH GRADE 7 2026

LEARNER'S COPY

Lina woke up early on Saturday for a tree-planting activity. She packed water, wore her old sports shoes and walked to school with her neighbour, Naliaka. At school, their teacher divided the learners into groups and gave each group seedlings and a digging stick.

Lina and her friends dug holes near the school fence. Naliaka asked, "Why are we planting trees?"

Lina replied, "They will give us shade and make our school greener."

The learners planted the seedlings, covered the roots with soil and watered the trees. They also collected the empty packets. Their teacher thanked them for keeping the school clean and reminded them that everyone had a role to play in caring for the environment. Lina was tired but happy because their hard work would help make the school cleaner, greener, and more beautiful.
